

EXPERIMENT-7

Students Attendance System

AIM

To create a simple Cloud-based Mark Sheet Processing System using Zoho Creator to demonstrate the Software as a Service (SaaS) model and process student marks to calculate Average, Percentage, Rank, and Overall Performance.

PROCEDURE

1. Open Zoho Creator and create a new application.
2. Create a form named Student Mark Sheet.
3. Add the required fields:
 - Name of the Student
 - Register Number
 - Subject 1
 - Subject 2
 - Subject 3
 - Subject 4
 - Subject 5
 - Total Marks
 - Average
 - Percentage
 - Rank
 - Overall Performance
4. Enter the marks obtained by the student for each subject.
5. Calculate Total Marks by adding all subject marks.
6. Calculate Average using the total marks and number of subjects.
7. Calculate Percentage based on the total marks.
8. Assign Rank based on the student's percentage compared with other students.
9. Set Overall Performance based on the percentage, such as Excellent, Good, Average, or Needs Improvement.
10. Create a report to display the student mark sheet.

11. Test the application by entering sample student details and marks.

12. Deploy the application on Zoho Creator Cloud and access it through a web browser.

IMPLEMENTATION:

INPUT:

The screenshot shows the 'Student Attendance' form in Zoho Creator. The form is titled 'Student Attendance' and is located within a sidebar menu labeled 'SA Student attendance'. The form fields are as follows:

- Name: First Name (text input), Last Name (text input)
- Register No: (text input with masked characters)
- Course: (dropdown menu with '-Select-' selected)
- Present: (text input with masked characters)
- Absent: (text input with masked characters)
- OD Request: (radio buttons for Choice 1, Choice 2, Choice 3)
- Total classes: (text input with masked characters)
- Attendance Percent: (text input with masked characters)
- Grade: (text input)

A 'Submit' button is located at the bottom right of the form.

OUTPUT:

The screenshot shows the 'All Student Attendances' table in Zoho Creator. The table has the following columns: Name, Register No, Present, Absent, Total classes, Grade, Course, OD Request, and Attendance Percent. The table contains one record for 'Suji S'.

Name	Register No	Present	Absent	Total classes	Grade	Course	OD Request	Attendance Percent
Suji S	13678987	45	5	50	A	Choice 1	Choice 1	90.00

The table is displayed in a 'Table View' and includes a 'Showing 1 of 1' indicator at the bottom.

RESULT

Thus, a Cloud-based Mark Sheet Processing System was successfully created using Zoho Creator. The system stores student details and marks and automatically processes Total Marks, Average, Percentage, Rank, and Overall Performance, demonstrating the SaaS model.
