

## **EXPERIMENT-3**

### **Flight Reservation System**

#### **AIM**

To create a simple Cloud-based Flight Reservation System using Zoho Creator to demonstrate the Software as a Service (SaaS) model and allow users to search and reserve Domestic and International flights based on trip type, locations, travel date, travelers, class, and fare type.

#### **PROCEDURE**

1. Open Zoho Creator and create a new application.
2. Create a form named Flight Reservation.
3. Add the required fields:
  - Trip Type – One Way / Round Trip
  - From
  - To
  - Departure Date
  - Return Date
  - Travelers
  - Class – Economy / Business / First Class
  - Fare Type – Regular / Flexible
  - Flight Type – Domestic / International
4. Enter the source and destination locations.
5. Select One Way or Round Trip.
6. Select the departure date and, for a round trip, the return date.
7. Enter the number of travelers and select the travel class.
8. Select the required fare type.
9. Select whether the flight is Domestic or International.
10. Create a report to display the submitted flight reservation details.
11. Test the application by entering sample reservation details.
12. Deploy the application on Zoho Creator Cloud and access it through a web browser to demonstrate the SaaS model.

## IMPLEMENTATION:

## INPUT:

The screenshot shows the 'Flight Reservation' form in Zoho Creator. The form is titled 'Flight Reservation' and is located in the 'Development' environment. The form fields are as follows:

- Name: Two input fields for 'First Name' and 'Last Name'.
- Trip Type: Two radio buttons for 'Round Trip' and 'One Way'.
- From: One input field.
- To: One input field.
- Departure Date: One input field with a date picker (dd-MM-yyyy).
- Return Date: One input field with a date picker (dd-MM-yyyy).
- Travelers: One input field with a text mask (#####).
- Class: One dropdown menu with '-Select-'.
- Fare Type: One dropdown menu with '-Select-'.
- Flight Type: Two radio buttons for 'Domestic' and 'International'.

A 'Submit' button is located at the bottom of the form.

## OUTPUT:

The screenshot shows the 'All Flight Reservations' table in Zoho Creator. The table has the following columns: Name, Trip Type, From, To, Departure Date, Return Date, Travelers, Class, Fare Type, and Flight Type. The table contains one record for 'Diya D'.

| Name   | Trip Type  | From    | To    | Departure Date | Return Date | Travelers | Class       | Fare Type | Flight Type |
|--------|------------|---------|-------|----------------|-------------|-----------|-------------|-----------|-------------|
| Diya D | Round Trip | Chennai | Delhi | 06-Oct-2026    | 14-Oct-2026 | 2         | First Class | Flexible  | Domestic    |

The table is displayed in a list view with a 'Showing 1 of 1' indicator at the bottom.

## RESULT

Thus, a Cloud-based Flight Reservation System was successfully created using Zoho Creator. The system allows users to enter One Way/Round Trip, From, To, Departure Date, Return Date, Travelers, Class, Fare Type, and Domestic/International flight details, demonstrating the Software as a Service (SaaS) model.
