

EXPERIMENT-9

Hospital information system

AIM

To create a simple Cloud-based Hospital Information System for SIMATS Hospital using Zoho Creator to demonstrate the Software as a Service (SaaS) model and maintain patient, attender, doctor, and disease details.

PROCEDURE

1. Open Zoho Creator and sign in.
2. Click Create Application → Create from Scratch.
3. Enter the application name SIMATS Hospital Information System.
4. Create a Blank Form named Patient Information.
5. Add the following fields:
 - Patient Name
 - Age
 - Address
 - Phone
 - Email
 - Attender Name
 - Attender Phone
 - Doctor Name
 - Disease
 - Gender
 - Patient ID
 - Admission Date
6. Set suitable field types such as Single Line, Number, Phone, Email, Date, and Dropdown.
7. Enter sample patient information into the form.
8. Create a List Report using the Patient Information form.
9. View and manage the stored patient records through the report.
10. Test the application by adding different patient records.

11. Deploy the application on Zoho Creator Cloud.

12. Access the application through a web browser to demonstrate the SaaS model.

IMPLEMENTATION:

INPUT:

The screenshot shows the 'Hospital information system' form in Zoho Creator. The form is titled 'Hospital information system' and is part of a 'Development' environment. It contains the following fields:

- Patient Name (First Name, Last Name)
- Age (Text field)
- Address (Address Line 1, Address Line 2)
- City / District (Text field)
- State / Province (Dropdown menu)
- Postal Code (Text field)
- Country (Text field)
- Phone (Text field with country code dropdown)
- Email (Text field)
- Attender Name (First Name, Last Name)
- Attender Phone (Text field with country code dropdown)
- Doctor Name (First Name, Last Name)
- Disease (Text field)
- Gender (Dropdown menu)
- Patient ID (Text field)
- Admission Date (Text field with date format MM/DD/yyyy)

A 'Submit' button is located at the bottom right of the form.

OUTPUT:

The screenshot shows the 'All Hospital Information Systems' table in Zoho Creator. The table has the following columns: Patient Name, Age, Address, Phone, Email, Attender Name, Attender Phone, Doctor Name, Disease, Gender, Patient ID, and Admission Date. The table contains one record for a patient named Suji S, aged 19, with an address in RM Nagar, Thiruvottriyur, Chennai, Tamilnadu, 600019, India. The patient's phone number is +919361785643, email is suji123@gmail.com, and the attender is Priya S with phone number +919562782678. The doctor is Preethi C, the disease is Fever, the gender is Female, the patient ID is P1001, and the admission date is 04-Oct-2026.

Patient Name	Age	Address	Phone	Email	Attender Name	Attender Phone	Doctor Name	Disease	Gender	Patient ID	Admission Date
Suji S	19	RM Nagar, Thiruvottriyur, Chennai, Tamilnadu, 600019, India	+919361785643	suji123@gmail.com	Priya S	+919562782678	Preethi C	Fever	Female	P1001	04-Oct-2026

RESULT:

Thus, a Cloud-based Hospital Information System for SIMATS Hospital was successfully created using Zoho Creator. The system stores and manages patient, attender, doctor, and disease information through a cloud-based application, demonstrating the Software as a Service (SaaS) model.
