

EXPERIMENT-4

Library book reservation system

AIM

To create a simple Cloud-based Library Book Reservation System for SIMATS Library using Zoho Creator to demonstrate the Software as a Service (SaaS) model and maintain details of library books, copies, rack numbers, and their availability status.

PROCEDURE

1. Open Zoho Creator and sign in to your account.
2. Create a new application named SIMATS Library Book Reservation System.
3. Create a new Blank Form named Library Book Details.
4. Add the following fields:
 - Title of the Book
 - Author
 - Publication
 - Year
 - Edition
 - No. of Copies
 - Rack No
 - Status
5. Set the Status field as a dropdown with Taken and Returned.
6. Enter the details of the books available in the SIMATS Library.
7. Create a List Report to display the stored book details.
8. Test the application by adding sample book records.
9. Deploy the application on Zoho Creator Cloud.
10. Access the application through a web browser to demonstrate the SaaS model.

IMPLEMENTATION:

INPUT:

RESULT

Thus, a Cloud-based SIMATS Library Book Reservation System was successfully created using Zoho Creator. The system maintains book details such as Title, Author, Publication, Year, Edition, Number of Copies, Rack Number, and Status, demonstrating the Software as a Service (SaaS) model.
